

MedStar Georgetown University Hospital/
MedStar Washington Hospital Center
Residency Program in Ophthalmology

Welcome to our Program

“Is it not a privilege to be one of the founders of an institution established for the relief of human misery and the restoration of sight and hearing?”

-- Bishop Satterlee, announcing campaign to build Episcopal Hospital.
Episcopal was built in 1897 and is our direct predecessor.

We are committed to:

- Superior medical and surgical education
- Compassionate, ethical and efficient medical and surgical eye care
- Your training
- Your success

Our Program:

- 18 Residents, 6 PGY1 Interns
- 4 Retina Fellows
- Over 175 Dedicated Faculty in All Subspecialties
- 7 Clinical Sites
- Focus on Autonomy and Clinical Confidence
- 125 Years of Resident Education, Patient Care and Innovation

Clinical Experience

Average Annual Procedures (at MWHC alone):

- 20,000+ clinic procedures
- 13,000+ cataract/general evaluations
- 5,000+ glaucoma evaluations
- 3,000+ retina evaluations

Surgical Experience

The 2024 Senior Residents Performed:

- 3450+ Class I surgeries in all rotations
- 4400+ total resident surgeries

PGY2 residents begin assisting in surgery early in the academic year.

Residents begin performing cataract surgery as primary physician in the PGY3 year.

Quality: Patient Care

One of city's largest, most complete facilities, with comprehensive ophthalmology clinics and subspecialty clinics in:

Glaucoma

Ocular motility

Vitreoretinal disease

Low vision

Oculoplastics

Orbital disease

Uveitis

Cornea and external disease

Neuro-ophthalmology

Ocular Trauma

We're All About Residents

- Protected Lecture Time
- Limited Number of Fellows – only retina
- Procedures: Premium Lenses, K-Pro, Advanced Glaucoma Surgery, DSAEK, intravitreal injections, PROKERA, etc.
- Opportunity for international/mission trips
- Free Food (and it tastes good, too)!

Resources

- Georgetown University
- Wet Labs
- Surgical Simulator
- On-Site Ocular Pathology Lab
- Attendance at National Programs and Meetings
- Attendance at National Training Symposia
- Access to Superb Medical Libraries
- GME Support
- Practice Experience of More Than 175 Ophthalmologists

Cutting-Edge Research

- Majority of Residents Present at National Meetings
- Resident Research Day
- Award for Ocular Innovation – cash award given annually to the resident whose proposal is selected for the best original concept, operation, instrument or invention in ophthalmology
- Full-Time PhD Research Faculty
- Faculty Involvement in National Studies

Residency Program Affiliates

MedStar Washington Hospital Center

Stacy Bang, MD

- Home Base
- Fully-supervised resident-run clinic
- Level I Trauma Center
- Excellent learning environment
- Extensive and varied pathology

MedStar Georgetown University Hospital

Jay M. Lustbader, MD

- Work directly with attendings in their practices
- Ophthalmic Pathology experience
- Basic science faculty available for research

MedStar St. Mary's Hospital

- Extensive clinical and surgical experience in a largely underserved area
- Comprehensive, cornea and glaucoma experience
- Excellent learning environment

DC Veterans Affairs Hospital

Soo Y. Shin, MD

- Resident-run clinic
- PGY3 cataract surgery
- Full subspecialty faculty

Walter Reed National Military Medical Center

Rachel Lieberman, MD

- PGY2 rotation
- Glaucoma and retina experience
- Experience in a large military general ophthalmology setting

Inova Fairfax Hospital

Tofik Ali, MD

- General and subspecialty clinics and operating room experience during PGY3 and PGY4 rotations
- Private surgery center experience

Children's National Medical Center

Malack Hamade, MD

- Nationally recognized pediatric hospital
- Birthplace of Pediatric Ophthalmology
- Exposure to multiple rare inherited disorders in PGY3 rotation

PGY2 Rotations:

MedStar Washington Hospital Center PLUS

- MedStar Georgetown University Hospital
- Walter Reed National Military Medical Center

PGY3 Rotations:

MedStar Washington Hospital Center PLUS

- 2-month pediatric rotation through Children's National Medical Center
- 2-month rotation through MedStar Georgetown University Hospital with experience in Cornea, Pediatrics and Neuro-Ophthalmology
- 4-month rotation through DC Veterans Affairs Hospital
- 2-month rotation through Inova Fairfax Hospital/MedStar Washington Hospital Center
- Dedicated research time
- Ocular Pathology

Rotation Schedule: PGY4

MedStar Washington Hospital Center PLUS

- DC Veterans Affairs Medical Center
- Inova Fairfax Medical Center
- MedStar St. Mary's Hospital
- Optional Mission/International Trip

Academics

- Wednesday academic afternoon
- Visiting Professor Series
- Journal Clubs
- FA Conferences
- MRI, Plastics, Ocular Motility, Neuro-op Rounds
- Symposia
- Interaction with other area program residents
- Grand Rounds
- Morbidity and Blindness Rounds
- Surgical Simulation/Wet Labs

Employee Benefits and Compensation

- Health and dental insurance
- Paid vacation
- Meal allowance
- Free parking
- Highly competitive salaries
- Much more!

2024 Graduates:

Philip Conkling

Fellowship – Retina – Albany Medical College, NY

Jack Creagmile

Fellowship – Glaucoma – UC Irvine, San Diego, CA

William “Bren” Davis

Private/Academic Practice – Comprehensive – Wills Eye Hospital, PA

Thomas Lamson

Fellowship – Global Ophthalmology – Wills Eye Hospital, PA

Obadah Moushmouth

Fellowship – Retina – Cook County Hospital, IL

Narmien Murdock

Fellowship – Oculoplastics – Wills Eye Hospital

2023 Graduates:

Natalia Diaz Torres

Private Practice – Williamsburg, VA

Russel Dinh

Fellowship – Retina – Vanderbilt University, TN

Kristen Godwin

Fellowship – Retina – Wake Forest University, NC

Marielle Mahan

Fellowship – Oculoplastics– OHSU/Casey Eye Institute,
OR

Sanam Shahrooz

Anterior Segment/Refractive Surgery – Masket
Foundation, CA

Justin Shortell

Fellowship – Glaucoma – Wills Eye Hospital, PA

Meet the Chiefs:

Abhishek Naidu, MD

Class of 2025

Graduate: SUNY Stony Brook

MS: Johns Hopkins Univ.

Undergraduate: Univ. of Western
Ontario

"Where do I even begin?! I absolutely love our ophthalmology program at Georgetown/Washington Hospital Center! The sense of camaraderie here is incredible—we're not just colleagues; we're a tight-knit family that supports each other through thick and thin. Whether we're in the OR or tackling a tough case in the clinic, we always have each others' backs. The mentorship is phenomenal, with attendings who are genuinely invested in our success and push us to excel. Every day brings new challenges that keep us on our toes, from complex surgeries to managing rare retinal diseases. The diversity of cases is thrilling and ensures we are constantly learning and growing. Plus, the environment is just fun—there's never a dull moment, and our sense of humor and personalities make even the toughest days enjoyable. I couldn't imagine a better place to train!"

“I am very fortunate to have trained at Georgetown/WHC ophthalmology. It has offered hands-on experience learning to treat the full range of ocular pathology. I have had supportive mentors who are passionate about teaching, and have learned from a diverse patient population with diverse pathology that has challenged me to grow daily. The collaborative environment fosters both personal and professional development, making every day rewarding and inspiring.”

Meet the Chiefs:

Anthony Fiacco, MD

Class of 2025

Graduate: Georgetown Univ. SOM

Undergraduate: Univ. of Alabama

“Autonomy with graded supervision is key in this program. You are your patients' primary ophthalmologist from the beginning of your training. You will follow your patients longitudinally for three years, while observing yourself grow from a strong clinician into an adept and flexible surgeon. Your co-residents and faculty will become your second family away from home, and you will forge some of our life's closest friendships. As a new ASOPRS Oculoplastics fellow at Wills Eye, I hit the ground running and owe it to my faculty mentors at Georgetown. Oh, and you will never be underfed thanks to your new DC mom, Penny!”

Karine Shebaclo, MD
Class of 2022 (Chief Resident)

“If you are looking for a program that will build your confidence in tackling any intimidating ophthalmic case, look no further. We see a wide array of complex pathology at a high frequency with a ton of autonomy, which makes you confident in medical and surgical management well before becoming an attending. Although seeing only eyeballs is daunting at first, the faculty and your peers are very supportive and foster an optimal learning environment. We worked hard, but played harder when enjoying the wonderful city of DC and its surrounding states.”

Justin Shortell, MD

Class of 2023 (Chief Resident)

“While in the MWHC/GUH ophthalmology residency program, my co-residents became my best friends and my attendings became my lifelong mentors. I graduated from the program with strong clinical and procedural skills, prepared for the next chapter in my career.

Currently, as an anterior segment fellow, I frequently encounter patients with complex ocular pathology and am learning to perform complex anterior segment surgery. Thanks to my residency experience, I can confidently diagnose complex pathology and manage these complex cases!”

Sanam Tiffany Shahrooz, MD
Class of 2023

Having the opportunity to complete residency at this program was the best thing that could have ever happened to me. By training here I developed the skills and confidence to handle any pathology in the clinic. In my first week of fellowship I was staffing a resident clinic in Rwanda, and I was surprised at how comfortable I was with whatever walked through the door. Nothing was overwhelming or scary. In addition to the training that I received, I also met a group of lifelong friends that I would not trade for the world.

Thomas Lamson, MD
Class of 2024

I am so happy that I ended up at this program. As long as you are willing to work hard, it will prepare you to confidently practice comprehensive or match into a competitive fellowship. The attendings are very approachable while also teaching you to be better. There is amazing camaraderie among residents. The clinic and academic requirements are not overly demanding leaving time for the rest of life. Go Hoya Ophthalmology!

William "Bren" Davis, MD
Class of 2024

Our residency prepares you for anything that might walk through the front door. You will see a wide breadth of medical and surgical disease in an environment with graduated autonomy. The thing I miss most about residency is our close-knit community. It's a great place to train and build relationships that will last beyond residency.

Philip Conkling, MD
Class of 2024 (Chief Resident)

Our program offers excellence in education and experience, providing comprehensive, compassionate care to all of our patients. Join us!
